

<HTML><PRE>• This library only accepts native wav files. Other types of files can be uploaded at Keyword: Upload. Please check the Guidelines and Tips in that area before uploading.

- All wav files must be appropriate as a Buddy List Sound. Generally they should be less than 3 seconds in length and 11Khz mono. Large wav files will not be accepted.

- All wav files must contain appropriate and original content, not found in other file libraries on the service. We will not accept any Trademark or Copyrighted sounds from movies, shows, music clips, etc.

- There is no need to upload a file you have downloaded from this library. What you are receiving when you download a file is a "copy" of the file so there is no need to replace it.

- All uploaded files will remain hidden so you will not immediately see your uploaded file. Uploaded files will be scanned for viruses and checked for content and size prior to being released to the sound library. Inappropriate files will be deleted.</PRE></HTML>
